## PERSONAL PROJECTS

### Correlation Coefficient Calculator

- It is based on statistical analysis to find relation between two variable. I have created this project using the Django python framework.
- Project Link: <https://correlation-coefficient-calc.herokuapp.com/>

### Personal Blog App

- This blogging app is created using Django. In this app i can publish my blog and edit it using Django admin panel and i have also implement a login system in this project.
- Project Link: <https://rjkblog.herokuapp.com/>

### Social Media Post Scheduler (06/2021 - Present)

- Currently, i am working on Social Media Post Scheduler This project is based on a scheduled post on different social media platforms using our portal. By using the portal, user can easily manage social media platforms & can save their valuable time.
